BREEDING REQUIREMENTS

2023 COVERING SEASON

The Levy Board Code of Practice for the control of Contagious Equine Metritis and other Equine venereal diseases for the 2022 Season will be applied at Whitsbury.

The Thoroughbred Breeders' Association Covid-19 Protocol for Thoroughbred Breeders will be strictly adhered to for the 2023 Breeding Season. This can be found at :

<https://www.thetba.co.uk/corona-virus-latest-information-and-guidance>

BOARDING MARES

DUE TO CHANGES IN STUD POLICY WE ARE NO LONGER ABLE TO ACCEPT MARES FOR FOALING OR MARES WITH FOAL AT FOOT. Please contact the stud office to discuss options of boarding maiden/barren mares.

CEM

A Clitoral CEM swab, taken after 1st January 2023, is required to be taken from all mares prior to their arrival with a certificate from a recognised laboratory. In addition to CEMO, these certificates must also state that Klebsiella and Pseudomonas have not been isolated. If a mare arrives without a certificate she will be isolated until a swab has been taken and the result received.

EVA/EIA

All mares that have not been outside the UK and Ireland within the last twelve months will require one negative EVA blood test and one negative EIA test to be taken after 1st January 2023 and before service.

All mares originating from outside the UK & Ireland will require two negative EIA tests and two negative EVA blood tests, the first to be taken within a 28 day period prior to arrival in the UK, with the second to be taken at the boarding stud no sooner than 14 days after arrival. Further blood tests will be taken as required to ensure that the mare is tested within 21 days prior to, and as close as possible to each covering until a final blood test has been taken a minimum of 60 days after the mare's arrival in this Country. Animals coming from Europe that are seropositive for EVA will require two tests in the UK with a stable or declining titre before they can be mated. All correctly completed travel documents should accompany the mare/s.

Any mare arriving from GERMANY or ITALY with a foal at foot will require a blood test for EIA to be taken from the foal a minimum of 14 days after arrival in this country.

NB. If a mare should leave the boarding stud after service or scanning in foal and thereafter wish to return during further oestrus, it may be necessary to provide a second negative EVA test.

These test results must confirm no significant rise in antibody titres (seroconversion).

STRANGLES

All mares boarding at Whitsbury originating from outside of the UK will be isolated and strangles blood tested on arrival. All mares will remain in isolation until a negative test has been returned. (This does not apply to mares walking in).

Owners or Managers are required to declare any possible contact or exposure their mares or stud might have had to **Strangles** over the last two years. The current Code of Practice guidelines on prevention and control will be observed.

WALKING – IN MARES

The following must accompany all mares which walk in for covering:-

- a) Clitoral CEM Swab certificate taken after 1st Jan 2023
- b) Cervical/Endometrial swab certificate taken during oestrus for CEMO and negative 24hr culture.
- c) **PHOTOCOPY OF PASSPORT** (or original) **to include number, markings and vaccinations** MUST accompany the mare on EVERY occasion when walking in. Equine influenza and tetanus Vaccinations must be up to date.
- d) Freedom from Infection certificate.
- e) Negative EVA certificate /s. (As stated in guidelines on pg1)
- f) Negative EIA certificate /s. (As stated in guidelines on pg1)
